Telephone Company Files Application For Rate Increase

Mark R. Sullivan, President of The Pacific Telephone and Telegraph Company and its wholly-owned subsidiary, the Southern California Telephone Company, announced that the first application in 28 years for a state-wide general increase in telephone rates has been filed with the Public Utilities Commission of California. Sharply rising costs and the lowest earnings in 30 years were cited as reasons for the action.

"Our problem is that prewar rates are not enough to meet prewar costs," said Mr. Sullivan. "We have made every effort to get along on present rates as long as we could before asking for price relief and now ask for only what is essential to meet current costs and keep the credit of the company sound. Although our revenues from California operations have gone up 105 per cent since 1940, our costs have climbed even faster—135 per cent. Costs of buildings, equipment and supplies of all kinds have increased tremendously. Our payroll, the largest item of expense, has more than tripled since 1940, due to higher wage rates and more employees." The company reported that current earnings on plant investment have dropped to the lowest level in at least thirty years—much lower than even in the worst years of the depression.

Homemade Bread is a rare treat nowadays, and being able to serve it is a feather in the cap of any cook—provided, of course, it's good bread. Understanding how to handle yeast can substitute for long experience in baking bread.

With detailed instructions in modern cookbooks, the home baker stands a fine chance of turning out delicious loaves on her first try. Some of the special tricks about handling yeast doughs are:

(1) Milk is the preferred liquid for bread because it adds nutritive value, and makes a loaf stay fresh longer and toast more evenly. Scald fresh milk first so that it will not turn sour in the dough. Be sure the milk has cooled to lukewarm (that elusive temperature which feels neither hot nor cool when you drop a bit on your wrist) before you add it to the yeast. Evaporated milk need not be scalded.

(2) Use as little flour as possible on the kneading board. An easy way to knead is to fold the dough over toward you, then press down and away from you with the heels of your hands. At the same time give the dough a quarter turn. Repeat the process until the dough is smooth and

satiny and does not stick to your hands.

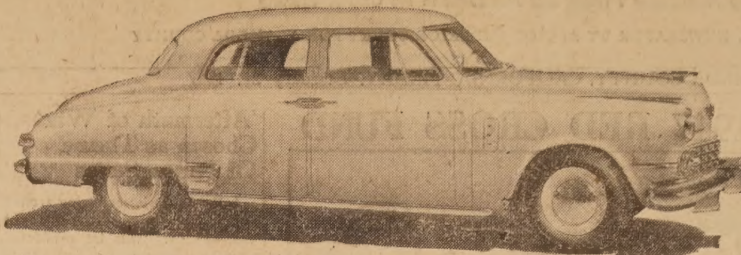

(3) Set the dough in a warm place to rise until not quite double in bulk. A good way to gain experience in bread making is to start with a simple recipe, just as you'd choose a simple pattern for your first efforts at dressmaking. Such a beginner's recipe is this one for Basic Beaten Batter. It's also popular with experienced bakers because it takes so little time. It does not require kneading or molding.

Basic Beaten Batter

- 1 cup compressed yeast, or dry granular yeast
- 1 1/2 cups lukewarm water
- 1 cup milk
- 1/2 cup shortening
- 2 tablespoons sugar
- 1 teaspoon salt
- 2 eggs
- 3 cups sifted flour

Soften yeast in lukewarm water. Scald milk and add sugar, shortening and salt. Cool to lukewarm. Add 1 cup flour and beat well. Add yeast and unbeaten eggs. Beat until smooth. Cover and let rise until light, about 1 1/2 hours. Stir down, and drop by spoonfuls into greased baking pans only half full to allow room for batter to rise again before baking. To make dinner rolls, bake batter in muffin tins. A ring mold may be used for a tea ring, and Swiss round cake pans for coffee cake. Toppings for tea ring or coffee cake might be cinnamon sugar, or orange sugar with chopped nuts, dried fruit, or shredded coconut.

The model is the 1947 Land Cruiser. Available only as a four-door sedan, it carries the now familiar Studebaker design to even higher standards of spaciousness and comfort. "Since the Land Cruiser has only recently gone into production at the Studebaker plant in South Bend, Ind., we consider ourselves fortunate in being able to arrange a showing at this early date," said Villa. "The car is longer and roomier than any we have previously shown, but it will undoubtedly become best known for its restful cushioning and tasteful interior appointments."

Extras Needed In Passion Play

One hundred actors and actresses to serve as extras in the world-famous Passion Play which comes to the Oakland Auditorium in early April, are requested to be at the Alden Branch Library, February 21 and 24, at 8 o'clock, to be interviewed by Nina Dene Crawford, teacher of voice and dramatic art, who is in charge of recruiting for the augmented cast.

The Passion Play is under the direction of Josef Meier, world renowned Christus portrayer, and is sponsored locally by the Children's Hospital of the East Bay. This is an opportunity for local talent to contribute to a very worthy cause, and at the same time take part in a moving and dramatic spectacle which dates back to 1242. The play, which makes its home in the Black Hills of South Dakota, has become an American institution, and is at present on tour.

Ministers, and other leaders of spiritual and cultural development, are asked to bring the request for players to the attention of their churches and club groups. Those who cannot be present at the library (in the basement auditorium, reached from 52nd Street) on the dates mentioned, will please write to Miss Crawford, 421 Bellevue Avenue, Oakland 10, giving name, phone, address, and a personal description of the writer, and the hours available telephoning.

GO TO CHURCH SUNDAY

Q. What is the name of this cut of meat?

A. This is a corned beef brisket. The brisket is the cut most commonly used for corned beef, although it is also sold fresh.

Q. Where does the cut come from, and how is it identified?

A. The brisket is a cut from the forequarter of beef, located under the fore shank. When sold as corned beef, it is usually a boneless cut. It is a rather thin cut with layers of fat and lean.

Q. How is this cut prepared?

A. Corned beef is cooked by simmering, in water sufficient to cover the meat. It requires from 3 1/2 to 5 hours to cook tender. It is often served in such dishes as Corned Beef and Cabbage or a New England "Boiled" Dinner. The meat is also delicious served in cold slices or a pressed loaf. Corned Beef Hash is a favorite dish, made with left-over corned beef and boiled potatoes.

LUSTY FARE FOR WINTER

Nothing could be more appealing on a cold, wintry night than this combination of sturdy foods—a baked ham shank, a pot of home-baked beans, and steamed Boston brown bread. Shown here is the cushion part of a split ham shank, slow-baked to savory tenderness, glazed and studded with cloves.

SAINT ALBAN'S

"Simmobile" will be the topic of the sermon by Dr. Randolph Crump Miller, in which he will analyze the basis of sin from the standpoint of the reactions of a normal person to automobile driving. There will be a special offering for the Bishop's Bed Fund. At the 9:15 a. m. church school service. The story will be given by James Leland Jones, Jr., assistant to the vicar. The choir will be under the direction of Miss Marguerite Henry.

Why we are asking for increased telephone rates

The responsibility of furnishing telephone service in California carries with it the obligation to see to it that the service shall be adequate and dependable. Now, in order to fulfill our obligation properly, we have found it necessary to apply for increased rates. We would like to tell you why they are needed.

Our pre-war costs have more than doubled.

Good service for the public comes from good employees and good equipment. The cost of both has risen greatly in recent years. Total wage expense, which represents two-thirds of our operating expenses has more than tripled since 1940, due to more employees and higher wages.

Our business in California has grown and revenues have increased 105% in this period, but costs have climbed even faster—135%. Costs of buildings, equipment and supplies of all kinds have gone up tremendously. As a result, present rates are inadequate.

Present local rates were set many years ago.

Charges now being made for local telephone service in California are based on rates that were established many years ago... in most cases as far back as 1919. Until 1940, through continuing efficiency in our operations and rapid technological advances, we were able to give our customers steadily-improving telephone service, progressively increase the pay of our employees and pay dividends to the thousands who had invested in our business. We were even able to reduce many rates, particularly on toll calls.

We are not seeking large profits.

In asking our customers to pay more for service we are not seeking

large profits. Our policy with respect to earnings and service will continue to be: "To furnish an ever-improving telephone service at a cost as low as is consistent with financial safety."

Current earnings are the lowest in many years.

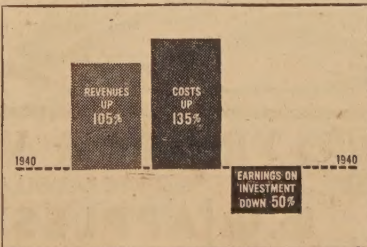

Current earnings on our plant investment in this state have dropped to the lowest level for at least 30 years—much lower than even in the worst years of the depression. And right now...

There is a big job ahead.

To meet unprecedented demands for service and to keep pace with California's amazing growth we are engaged in the largest expansion and improvement program in our history... a program which will cost \$150,000,000 in this state during 1947 alone... a program that will mean steady employment for thousands of California's citizens and...

Adequate earnings are essential.

We have waited as long as we could to ask for higher rates, but more money is essential now. Millions of dollars of the savings of thrifty Americans must be invested to finance the necessary increases in plants and equipment. Thrifty Americans, being good business men and women, will invest these millions if, and only if, there is reasonable assurance of a fair return. The increase in total revenue we ask is only what is required to maintain a sound credit position, and we feel is moderate and in the public interest. We would fail in our responsibility if we allowed further time to elapse before making it.

EDITORIAL

GEORGE WASHINGTON

February 22nd, 1732 — December 14th, 1799

Tomorrow we of Albany join with the rest of the nation in the celebration of the birthday of George Washington, first in war... first in peace... and first in the hearts of his countrymen.

As we celebrate this timely event that permitted you and I to be a part of this great nation, the United States of America, we should stop... give pause and remember the advice of this great American when he said... "FRIENDLY RELATIONS WITH ALL NATIONS. BUT ENTANGLING ALLIANCES WITH NONE."

This statement uttered by our first president is as true today as it was more than a century and a half ago when he uttered those words in his advice to the state and nation.

Washington had a God-given right to advise this nation... without his and his army's sacrifices at Valley Forge there would have been no United State of America, we are not free because of a Declaration of Independence... we are only free because our forefathers wrote across the pages that we now call history in red letters of blood... "AMERICA FREE" we have had to defend that freedom several times... it is possible that we may have to do it again.

But the chances that your boy and my boy will have to join the fight in an army that Washington organized and founded will be less possible if we follow his warning in our international dealings with nations.

Today another general of our armies has been appointed Secretary of State... He and he alone is responsible for our foreign policy. The appointment of General Marshall as Secretary of State should mean a great deal to the average man and woman in America because in his selection and appointment we have made a choice of the top brains of the country, because of General Washington's greatness the title of General of the Armies has been bestowed on only a few men... General Marshall won that single honor. No other person in the past who has obtained that rank has ever let the people down so we of America can have faith in General Marshall's selection because we know that, "Live of great men all remind us that we can make our lives sublime and departing leave behind us footprints on the sands of time." The footprints of Washington are so imprinted that it will be an easy matter for Secretary of State Marshall to follow them.

PACIFIC GAS AND ELECTRIC COMPANY

The Cost of Gas and Electricity has gone DOWN and DOWN
Natural Gas Rate Cuts in 1939, 1940, 1943 and 1946 slashed the average cost of Gas in the home...33 per cent. Electric Rates have been cut SEVEN TIMES since 1939... a series of reductions that place P.G. and E. electric rates 20 per cent below the national average.

TIRES

There's **EXTRA SAFETY** in the Tire that **OUTWEARS PREWAR TIRES**

While many postwar products are still in the dream stage, one is not... the new postwar B.F. Goodrich Silvertown that **OUTWEARS PREWAR TIRES**.

It's been produced... and what is more... in the past twelve months it's been delivered to car owners in greater quantities than any tire in B.F. Goodrich history.

Of course, many car owners have heard about the thousands of extra miles of service from the broader, flatter tread that covers more road area and gives greater protection against skidding. They know about the 35% stronger cord body that gives better resistance to road shocks and bruising. It's no wonder the factory's out-

standing production has been taxed keeping up with this extra demand.

But this is one product you can take out of your dream book... it's here. If you'll be needing new tires soon... check with us today for the tire that's worth much more but costs no more—the B.F. Goodrich Silvertown that **OUTWEARS PREWAR TIRES**.
